A Little Bit about Ron Hemming

Ron Hemming was born in Birmingham, England, In 1948, and discovered his lifelong passion for football at just 6 years old. After emigrating to Australia in 1973, he settled in Bathurst at the age of 44, remaining an active figure in the local football community. Diagnosed with Parkinson's disease in 2014, Ron has faced the condition with the same resilience and determination he brings to the football pitch. "Ron's message of hope." "A diagnosis changes your path, but it does not define the journey. Just like in a tough match, you adapt, you find your strength and keep moving forward. Surround yourself with community, stay active, and never lose your passion for the things you love."
